

DIAPHRAGM PUMPS Pump Models and Data

Premium Quality ALLFLO Pumps

Our double diaphragm pumps can be operated by compressed air or any non-flammable compressed gas, do not require lubrication, are resistant to freezing, and will not stall at slow speeds. They have a simple, rugged design that is resistant to dirty or wet air supply, and does not use brass or other metallic components in their all-plastic air system, so there is no risk of corrosion. The pumps are self-priming and can run dry without damage. Capable of pumping anything that will pour, these pumps are ideal for waste oil or other high viscosity fluids. All models come with a muffler.

We stock these models, please call us for a different size

| Aluminum Diaphragm Pumps | |
|--------------------------|------------------------------------|
| 19066 052 | 1/2" Aluminum, Geolast, PTFE Balls |
