

Equipment Sets with Diaphragm Pumps

Waste Oil Sets for Wall Mounting

Recommended for draining waste oil from oil drains. Wall mounted pump set will drain filled oil drains and pump waste oil to a remote bulk waste oil holding tank.

High performance diaphragm pumps drain oil drain contents in seconds. Sets include a diaphragm pump, wall mount bracket, 3/4" suction hose to connect to oil drains with 3/4" Parker quick connect couplers. Air pressure regulator. 3/4" Hose to connect to discharge site of pump and material pipe to bulk waste oil holding tank.

Depending on the required volume the diaphragm pumps have a max. pump capacity of 17 or 41 gallon per minute. The pumps easily pump the waste oil over a distance with a lift capacity of vertical 15 ft. Set includes 19522 Mounting bracket, dim. 9x10" with 2" bung opening. Designed to hold diaphragm pumps.

19801 Set with 1/2" diaphragm pump No 19066 052

19802 Set with 1" diaphragm pump No 19067 052

Mobile Fluid Transfer Equipment. To fill antifreeze directly from a 55 gallon drum with a diaphragm pump.

Sets come with a 1/2" air diaphragm pump, 6 ft. hose and suction tube for 55 gallon drum, digital Badger flow meter for anti freeze, The suction tube for 55 gal drum is designed for a quick drum exchange connected to diaphragm pump with a 6 ft. 1/2" connecting hose to remove suction tube. All equipment is mounted on a heavy duty hand truck designed for 55 gal drums. Delivery performance 17 gpm.
